Jon,

Thanks! I pulled these coordinates from the NPDES permits themselves, and then checked on Google maps to make sure they're accurate. Thus, the list in this spreadsheet represents (within a couple tens of feet) the actual locations.

Thanks again,
Everett

Everett,

I am telecommuting today but will try to complete a draft for you by COB. I can add some more water bodies and rivers, I but will be limited by the scale of the map. In the future, coordinates in a spreadsheet would be preferable. I can not vouch for the accuracy of the permit locations since they are not managed by the GIS group, so please make sure to review the map carefully before your briefing. We have found that more than 60% of the time data received from other programs are incorrect.

Are these permits from the NPDES program?

John,

Kimi tells me that you're the man to speak to about maps. ORC and OPRA are going to be briefing Jim Martin next week (probably Tuesday) about 13 oil and gas permits on the Wind River Reservation. We would like to be able to have a map to indicate their location and jurisdictional status. Would it be possible for you to plot the coordinates pasted below on a map of the reservation that also shows water bodies and surface ownership status?
